

N^o 2597

A.D. 1892

Date of Application, 10th Feb., 1892

Complete Specification Left, 10th Nov., 1892—Accepted, 10th Dec., 1892

PROVISIONAL SPECIFICATION.

**An Embrocation, specially applicable to Treating cases of
Bronchitis, Rheumatism, Neuralgia, and Sprains.**

I, JOHN HILL, of 35^A Bridge Street, in the City and County of Bristol, Tailor,
do hereby declare the nature of this invention to be as follows :—

This invention consists in an embrocation which is specially applicable to treating
cases of bronchitis, rheumatism, neuralgia, and sprains.

- 5 The embrocation in which this invention consists is composed of an admixture of
Castille soap liquefied by the agency of whisky, and camphor liquefied by the
same agency. The soap and the camphor are preferably pulverized before being
subjected to the action of the whisky which is of a strength of approximately
from twenty to twenty five degrees overproof. The proportion of spirit to pulverized
10 Castille soap is approximately a gallon of spirit to 1 lb. of soap. Similar proportions
apply in dissolving the camphor.

The solutions are mixed together in approximately equal parts to constitute the
embrocation.

Dated this 9th day of February 1892.

COMPLETE SPECIFICATION.

**An Embrocation, especially applicable to Treating cases of
Bronchitis, Rheumatism, Neuralgia, and Sprains.**

- 20 I, JOHN HILL, of 35^A Bridge Street, in the City and County of Bristol, Tailor,
do hereby declare the nature of this invention and in what manner the same is to
be performed, to be particularly described and ascertained in and by the following
statement :—

This invention consists in an embrocation which is specially applicable to treating
25 cases of bronchitis, rheumatism, neuralgia and sprains.

The embrocation in which this invention consists is composed of an admixture of
Castille soap liquefied by the agency of whisky, and camphor liquefied by the like
agency. The soap and the camphor are preferably pulverized before being sub-
jected to the action of the whisky which is of a strength of approximately from
30 twenty to twenty five degrees overproof.

The proportion of spirit to pulverized Castille soap is approximately a gallon of
spirit to 1 lb. of soap. Similar proportions apply in respect of the camphor and
spirit.

The solutions are mixed together in approximately equal parts and when thus
35 mixed constitute the embrocation.

The embrocation is applied in substantially the same way as is customary with
others of a kindred nature, namely, by rubbing externally.

Having now particularly described and ascertained the nature of my said inven-
tion, and in what manner the same is to be performed, I declare that what I
40 claim is :—

An embrocation, mainly for treating cases of bronchitis, rheumatism, neuralgia
and sprains ; said embrocation consisting of Castille soap (preferably pulverized)

[Price 8d.]

Hill's Embrocation, specially applicable to Treating cases of Bronchitis, &c.

dissolved in whisky of approximately from 20 to 25 degrees overproof, and camphor dissolved by the like agency ; the solutions being mixed together in approximately equal proportions, substantially as hereinbefore set forth.

Dated this 19th day of October 1892.

NICHOLAS WATTS, 5
Agent.
